Tree No.	Species	Height (m)	Trunk Diam (cm) @ 1.5m	Crown Radius (m)	Vigour Low or Normal?	Age	Surrounding Features	Condition Good Fair Poor Dangerous	Reccommendations / Priority	
									Action Yes/No	NGR, Priority & Notes
RG5	Silver Maple (Acer Saccharinum)	15	89	8.3	N	40+?	In Grass nr Pavilion	Good	Yes	<p><u>Ngr SU29852 36133 Priority:3</u> The tree is near the Pavilion and it's canopy overhangs it. There appears to be no structural issues, disease or fungal colonisation. There are some small dead branches which need to be removed. Annual monitoring should be done due to the high footfall passing this tree</p>
RG6	Horse Chesnut (Aesculus Hippocastanum)	7	41	3.8	L	unknown	Open Grass	Fair	Yes	<p><u>Ngr SU29874 36149 Priority:3</u> The tree is in the open. There appears to be no structural issues, disease or fungal colonisation. There is basal growth where it has been damaged by strimming. Annual monitoring should be done as this tree does not seem to be thriving. It does not pose a hazard due to its small size.</p>
RG7	English Oak (Quercus Robur)	4.5	24	2.6	N	2000 (21 yrs)	Open Grass	Fair	Yes	<p><u>Ngr SU24896 36147 Priority:3</u> The tree was planted by the WI for the millenium. There appears to be no structural issues. It may have disease or fungus as the Acorns are mis-shaped. Annual monitoring should be done as this tree does not seem to be thriving. It does not pose a hazard due to its small size.</p>
