

**NETHER WALLOP PARISH COUNCIL**

**To consider and if appropriate to approve the costs for Survey Monkey.**

Need for subscription: To provide two engaging surveys for children and parents/adults to find out local support for refurbishing the play equipment and parking at the playing fields.

**Cost:** Survey monkey is £32 per month, with an annual payment of £384.

**Lime Survey** has been reviewed, but is very difficult to use.

The free version of Survey Monkey, limits the number of questions and does not allow pictures to be uploaded for each of multiple choice answers.

Council need to engage with all children in the Parish when considering the replacement play equipment. An outdoor event may be another good way of getting feedback, but will take a lot of organization and time and there will undoubtedly be children that cannot attend.

Most children in the parish have access to IT hardware to allow them to complete the survey with the help of parents. Any children needing access to hardware can be assisted on a case by case basis upon request from their parents/carers.

Councillors to decide if the subscription is good value for money to document local support for the project bearing in mind the project may cost upwards of £50k.

(NOTE – any grant funding applications will require evidence of local support for the project.)
